

Database Management Systems

Project final Report

Team Number: 1

Idea: Hospital Management System

Team Members:

Ahmed Fateen 201800260

Abdullah Emad 201701484

Contact info:

s-abdallah@zewailcity.edu.eg

Workload distribution:

Abdullah :

- Admin - Update Case
- Admin - View Case
- Doctor - View Case
- Admin- Update Employee

Ahmed:

- Admin - Add Employee
- Admin - Add Patient
- Doctor - Update Patient
- Admin - Update Patient

❖ Added functionalities after alpha release feedback:

- View medical record
- View all(patients,employee,case,room)
- Verify ID validation
- Receptionist main menu view
- Remove num of patient textbox from room

note:I have preferred making data validation on IDs textbox rather than putting them in the drop down menu as they will be too long!
